

IFIA Food Committee

Objectives

The objectives of the Food Committee are to:

1. Improve the professional image and standing of IFIA member companies within the feed, food and beverage products testing, inspection and certification industry (the industry) with all stakeholders, including farmers, primary processors, manufacturers, wholesalers, retailers, end users, consumer organisations and government bodies, with the aim of ensuring that IFIA is recognised as the primary authority for testing, inspection and certification within the industry.
2. Provide collective representation for IFIA member companies within the industry in order to convey their opinions and experience to external parties, in support of the common goal of improved feed, food and beverage safety and quality.
3. Provide an open forum for members to debate and formulate solutions to testing, inspection and certification issues within the industry.

Mission Statement

The mission of the IFIA Food Committee is: 'To use our combined knowledge and experience in order to reduce risk and improve overall quality and safety in the feed, food and beverage industry, for the benefit of all stakeholders.'

Vision Statement

- 1) A world in which all feed, food and beverages can be guaranteed to be safe.
- 2) A world in which the efforts of the Testing, Inspection and Certification Industry will ensure that an improved safety and quality of feed, food and beverages is available to all.
